

Level	Semester	Course Code	Course Name	Credits	Teaching Hours	Exam Duration	Max Marks
4.5	I	109501/ 110501/ 112501/ 123501/ 134501	Information Communication Technology	2	30	2 Hrs	30

Course Outcomes :	Students will be able to - 1. Understand the literature of social networks and their properties. 2. Which network is suitable for whom. 3. Develop skills to use various social networking. 4. Learn some GOI digital initiatives in higher education. 5. Apply skills to use online forums, documents, spreadsheets, presentation for communication, collaboration and research. 6. Get acquainted with internet threats and security mechanisms.			
Unit System	Contents	Workload Allotted	Weightage of Marks Allotted	Incorporation of Pedagogies
Unit I	Introduction to Networking: Introduction, Need of computer communication network, Communication protocol, Types of networks: LAN, MAN, WAN Topology: Ring, Bus, Star, Hybrid, Hierarchical & Mesh.	8 Hrs	8 Marks	The students have a problem understanding the concept of arrays, dealing with the syntax of the language, designing the organization of the program and understanding the concept of flow control such as looping and branching or function calls. 1. To help solve this problem we have divided the various concepts and used different examples in day to day life. 2. The Necessity of Teaching Reform: The final goal of programming teaching is making the students mastering the ability of coding and debugging. 3. Chalk and Board
Unit II	Internet: History, Applications of Internet, Types of Internet Connection: wired and wireless. Internet Protocols: TCP/IP, FTP, HTTP, URL, e-mail address, WWW, Web browsers, Search Engines, Introduction to Social Networking: Twitter, LinkedIn, Facebook, Flickr, Skype, YouTube, WhatsApp.	7 Hrs	7 Marks	
Unit III	E-mail: Definition of E-mail, Advantages and disadvantages, User Ids, Login, Passwords, Email Addresses, Domain Names, Mailers, Message Components, message Composition, Mail Managements. G-Suits: Google Drive, Google Documents, Google Spread Sheets, Google Slides and Google Forms.	8 Hrs	8 Marks	

Unit IV	Internet Securities: -mail threats and secure E-mails, Viruses and Antivirus Software, Firewalls, Cryptography, Digital Signatures, Copyright issues.	7 Hrs	7 Marks	method. 4. Power point presentation with animation. 5. Use of online software to explain the coding and debugging.
Reference s:	Course Material/Learning Resources Text books: 1) Computer Networks (Fourth Edition) - Andrew S. Tanenbaum (PHI) 2) Information Technology - Alexies & Mathews - Vijay Nikole Reference Books: 1) Fundamentals of the Internet and World Wide Web, 2/e – Raymond Greenlaw and Ellen Hepp, TMH publication. 2) Internet Technology and Web Designs, ISRD group, TMH Publication. 3) Information Technology- The breaking wave, Dennis P.Curtin, Kim Foley, Kunai Sen and Cathleen Mortin, TMH Publication. 4) Computer Network & Internet - Douglas E. Comer (Pearson)			
Model Questions:	Short Type (At least 8) 9. What is Computer Networks. 10. Differentiate between Lan, Man and WAN 11. What is Internet? What are its applications? 12. How to secure your E-mail?. 13. What are the components of E-mail?? 14. What is the Internet Protocols? 15. What is network topologies?? 16. What are the copyright issues? Long Type (At least 4) 9. Explain the types of computer Networks. 10. Explain Bus topology with advantages and disadvantages. 11. Explain how to create E-mail address. 12. Explain the types of viruses. 13. Explain i) Cryptography ii) Digital Signature 14. Explain how to create google form? MCQs for Internal Assessment (At least 8) 6. What is internet? a) A network of interconnected local area networks b) A collection of unrelated computers c) Interconnection of wide area networks d) A single network What is the full form of CPU? 7. What is a computer network? a) A device used to display information on a computer screen b) A collection of interconnected computers and devices that can communicate and share resources c) A type of software used to create documents and presentations d) The physical casing that protects a computer's internal components 8. Which topology requires a multipoint connection? a) Ring b) Bus c) Star			

	d) Mesh Which of the following is designed to control the operations of a computer? 9. What is the term for the data communication system within a building or campus? a) MAN b) LAN c) PAN d) WAN 10. E-mail stands for? A. Electrical mail B. Electronic messaging service C. Electronic mail D. All of these 6. What is the URL of a website? A. It is the location of website on internet B. It is used to create internet C. It is location of peripheral on internet D. None of these 7. "@" in an email address is used to ____. A. Separate username from ISP B. Create password for email C. Add strength to email D. None of these 8. Which of these are web browsers? A. Google Chrome B. Internet Explorer C. Brave D. All of these
