Most Repeated Questions

Asked in 4 Papers

1. Illustrate the block diagram of a computer with labels.
 2. Explain the functions of the operating system.
 3. What is Memory? Explain the types of RAM.
 4. What is Cache memory?
-

Asked in 3 Papers

5. What is the Booting process? Explain.
 6. What is a printer? Explain the types of printers with examples.
 7. Explain the working of the scanner.
 8. What is Mouse? Write its usages.
 9. What is an operating system?
 10. What is an SSD?
-

Asked in 2 Papers

11. Explain the generations of computers.
 12. Explain the uses of computers.
 13. What are the major characteristics of a computer system?
 14. What is a CPU?
 15. What is ROM? Explain its types.
 16. Discuss the functions of a keyboard as an input device.
 17. Discuss the role of a modem in computer communication.
 18. Compare VDU and LCD monitors.
 19. Illustrate the working principle of a touch screen.
 20. Explain real time operating systems.
 21. Explain time sharing operating system.
 22. Interpret the differences between RAM and ROM with suitable examples.
 23. Compare SSD and Hard Disk Drive (HDD).
 24. Identify the main difference between primary and secondary memory.
 25. What is secondary storage? Explain Hard Disk.
-

Asked Once

26. Write a full form of ALU.
 27. Write the reliability and diligence characteristics of computers.
 28. What are the speed and accuracy characteristics of computers?
 29. What is Pen-drive? What are its advantages?
 30. What are input devices? Explain the scanner.
 31. What is the output device?
 32. Explain is a multiprogramming operating system.
 33. Identify and explain the real-time and distributed Operating Systems suitable for modern applications.
 34. What is memory management?
 35. What is resource sharing?
 36. What is process scheduling?
 37. Identify the difference between impact and non-impact printers.
 38. Explain the use of ALU.
-
